

MedPlant latest news - September 2015

Successful MedPlant Midterm meeting in the beautiful Thames Valley

The midterm meeting went very well. The EU representative was impressed by all fellows having results and being well on the way and the MedPlant network clearly being very active and well integrated taking optimal advantage of the synergies provided by the ITN network program. Next supervisory board meeting will be an on-line meeting **February 18 2016**.

2nd Summer School completed – also in the beautiful Thames Valley

Following the Midterm meeting the Fellows participated in both a MedPlant dissemination workshop organized by Nina Rønsted, Copenhagen and the 3 day course MedPlant Bioinformatics organized by Julie Hawkins, Reading.

'The course was really nicely organized and the people fit the different topics we wanted to approach. We also really liked to have 3 sessions in the same time and the chance to talk to the different researchers'. PhD fellow Vincent Manzanilla, Oslo.

Feedback for the MedPlant Manual?

Raj Puri presented the MedPlant Ethnobotany Manual, from the first Summer School in Morocco, at the Midterm meeting, an extensive hands-on manual which will be a great best practice product from MedPlant. Input or feedback should be sent to Raj Puri (R.K.Puri@kent.ac.uk) before **15 September 2015**.

MedPlant phase 2

The second financial period of MedPlant will be starting 1. October 2015, which means that all partners must fill in Form C by **31 October 2015**.

Now possible to blog at www.medplant.eu

We have set up a blog at the website, so please go ahead and use it whenever you have interesting news or updates to share! Both partners, associated partners and fellows have already or will receive info mail in the next few days with login details and how to.

MedPlant dropbox set up

All partners, associated partners and fellows should have received an invitation from Nina to share a MedPlant dropbox folder. Please let Mette know if there are any problems at mette.wenoe@snm.ku.dk.

Mission Impossible

Rogue Nation featuring MedPlant locations in Morocco - and who knows, maybe even MedPlant people in the field - out now!

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under

grant agreement no. 606895.
